

Classic Platform Hoists

The RGC Platform Hoist is the safest, most economical, and dependable way to raise materials to the roof on residential and commercial job sites. This powerhouse lifts shingles, plywood, wallboard and more to the roof quickly and safely. RGC ladder lifts reduce fatigue and prevent injuries by safely moving heavy materials to the roof with minimal effort.

Classic Platform Hoists are available in 200 lb. and 400 lb. lifting capacities, and your choice of gas or electric power drives, and 16 ft., 28 ft., or 44 ft. of track.

Platform Hoists are easy to transport and assemble and require minimal maintenance. Add hoist accessories to make any roofing project even easier.

Platform Hoist Features & Benefits

- Easy to reach long clutch and brake handles enhance user safety.
- Dual anchor points on the 3rd and 5th track cross ties add stability.
- Dual handle controls provide convenient, safe operation away from the load with minimal operator effort.
- Unique brake rope design allows safe, controlled platform descent without binding due to metal to metal contact as with band style braking systems.
- Location of controls keep the operator safely to the side of the load, not under it.
- Pulleys with polymer sheaves prolong wire rope life and permit smooth platform movement.
- Easy to transport and assemble with no special tools required.
- SAVES TIME and manpower.
- Large, open platform with removable rollers on all models for exceptional versatility.
- Ideal for use on steeper landscapes because the drive mounts higher on the track.
- Durable, long-lasting steel guide rollers on the platform main frame provide exceptional wear resistance.
- Heavy cast aluminum shoes on the base track section help stabilize the hoist on both pavement and dirt with a full 16 sq. in. contact area.
- Base track sections have cross tie support brackets that add rigidity and extra stability to system.
- Choose from three reliable power drive options: 4 hp Briggs & Stratton, 4 hp Honda, or 1.5 hp Electric motor.

250 lb. & 400 lb. Solar Panel Carrier

Provides secure, controlled lifting for solar panels speeding up setup and reducing the risk of damage.

250 lb. and 400 lb. Plywood & Truss Carrier

Securely move plywood, wallboard, roof trusses, framing materials, doors and more with ease.

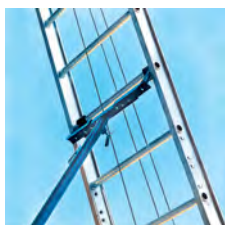

400 lb. Roller Angle Guide

This 6 ft. guide moves material away from the roof's edge on shallow inclines. Aluminum wheels are equipped with bearings.

400 lb. Platform with Gravel Hopper

Lifts 400 lbs. of granular materials with ease and discharges loads into wheel barrows, spreaders and other containers.

250 lb. & 400 lb. Telescoping Support

Required to provide extra support when lifting to heights over 28 ft. (Included in 44 ft. packages.)

Classic Drives

Classic Drives mount to the 3rd and 5th track cross ties for convenient use on steep landscapes. The unique dual handle control allows for feathering of the brake, resulting in smooth, controlled platform descent. The drive is easy to operate with minimal operator effort.

CLASSIC Platform Hoist Specifications

Model	400	200
Load Capacity	400 lbs.	200 lbs.
Lift Speed	110 fpm	220 fpm
Platform Size (in.)	24 x 24	17 x 18
Track (3-3/4 in. side rail)	24 in. wide	17 in. wide

Platform Hoist Packages

16 ft. - Includes Drive, platform assembly, top bracket and 8 ft. track with shoes plus an 8 ft. section.

28 ft. - Includes Drive, platform assembly, top bracket, 8 ft. track with shoes, 2- 8 ft. sections and 1- 4 ft. section.

44 ft. - Includes Drive, platform assembly, top bracket, 8 ft. track with shoes, 4- 8 ft. sections and 1- 4 ft. sections and telescoping track support.

TOUGH. RELIABLE. BUILT TO LAST.

TRUSTED BY ROOFING PROFESSIONALS SINCE 1946.
