

PHD Platform Hoists

The all-new RGC PHD Platform Hoist is engineered for contractors who need reliable lifting power in a lighter, more compact design. Built to meet the demands of busy crews, the PHD Drive delivers fast setup, intuitive operation, and the long-lasting durability trusted by roofing pros.

With 250 lb. and 400 lb. lifting capacities, the hoist is available with a gas powered drive in your choice of Briggs & Stratton or Honda engine, and 16 ft., 28 ft., or 44 ft. of track. The PHD Drive is compatible with both straight and pivoting tracks—providing greater flexibility for a wide range of jobsite conditions.

Easy to transport, quick to assemble, and low-maintenance, RGC Platform Hoists are a dependable solution for lifting shingles, plywood, tools, and more. A full line of accessories adds even more versatility, making the PHD Platform Hoist a smart, adaptable choice for professionals and dealers alike.

Platform Hoists Features & Benefits

- ➔ Long 32-inch, single control handle equipped with vinyl grip optimizes operation, for safe, easy control from the side—rather than beneath the load.
- ➔ Simplified single handle control reduces operator fatigue and improves handling on the job.
- ➔ Dual anchor points on the 3rd and 4th track cross ties add stability.
- ➔ Pulleys with polymer sheaves prolong wire rope life and permit smooth platform movement.
- ➔ Compact, lightweight design is easy to transport on and between job sites.
- ➔ Fast and simple assembly without any special tools.
- ➔ SAVES TIME and manpower, while keeping crews OSHA compliant by eliminating the need to carry loads up ladders.
- ➔ Large, open platform with removable rollers on all models for exceptional versatility.
- ➔ Ideal for use on steeper landscapes because the drive mounts higher on the track.
- ➔ Durable, long-lasting steel guide rollers on the platform main frame provide exceptional wear resistance.
- ➔ Heavy cast aluminum shoes on the base track section help stabilize the hoist on both pavement and dirt with a full 16 sq. in. contact area.
- ➔ Base track sections have cross tie support brackets that add rigidity and extra stability to system.
- ➔ Choose from two reliable power drive options: Briggs & Stratton or Honda gas engines.
- ➔ Packages available or customize to fit your needs.

250 lb. & 400 lb. Solar Panel Carrier

Provides secure, controlled lifting for solar panels speeding up setup and reducing the risk of damage.

250 lb. and 400 lb. Plywood & Truss Carrier

Securely move plywood, wallboard, roof trusses, framing materials, doors and more with ease.

400 lb. Roller Angle Guide

This 6 ft. guide moves material away from the roof's edge on shallow inclines. Aluminum wheels are equipped with bearings.

400 lb. Platform with Gravel Hopper

Lifts 400 lbs. of granular materials with ease and discharges loads into wheel barrows, spreaders and other containers.

250 lb. & 400 lb. Telescoping Support

Required to provide extra support when lifting to heights over 28 ft. (Included in 44 ft. packages.)

PHD Drives

PHD Drives mount to the 3rd and 4th track cross ties for convenient use on steep landscapes. The brake design allows for feathering of the brake, resulting in smooth, controlled platform descent. The drive is easy to operate with minimal operator effort.

PHD Platform Hoist Specifications

Model	400	250
Load Capacity	400 lbs.	250 lbs.
Platform Size (in.)	24 x 24	17 x 18
