

Pivoting Platform Hoist

The exclusive RGC Pivoting Platform Hoist is the most economical, safe and dependable way to transport very heavy materials and supplies from the ground up to the roof.

The OSHA compliant Pivoting hoist is ideal for use on long roofs and those with steep slopes. Its pivoting track section is adjustable between 35° and 75° and allows materials to be moved farther up the roof and away from the edge improving worker safety and increasing productivity.

The PPH is offered as a 400 lb. capacity, 44 ft. hoist and can be customized with various drive options. Each hoist is sold with one 8 ft. section of track with shoes, three 8 ft. sections with plates, three 4 ft. sections with plates and one pivoting track section. This combination allows the track to be configured for various applications.

Each system includes a complete track package that can be configured for a wide range of roof applications, giving crews the flexibility to work smarter, not harder

PPH Features & Benefits

- Choose the all-new lightweight PHD or heavy-duty Classic Power Drives to suit your needs and budget.
- Three drive options are available: Briggs & Stratton, Honda or Baldor electric motor.
- Easy to transport, assemble, and operate.
- Functions like a conveyor - but without the cost!
- Pivoting track is adjustable between 35° and 75° to fit nearly any roof pitch.
- Single handle control on the PHD provides convenient and safe operation with minimal operator effort.
- Long 32" handle is equipped with vinyl grip providing excellent control.
- Operator handle(s) located safely to the side of the load, not under it for safe operation.
- Heavy Duty all-metal drive frame is highly durable for maximum protection and durability.
- Fast, easy assembly with no special tools required.
- Pulleys with polymer sheaves prolong wire rope life and permit smooth platform movement.
- Heavy cast aluminum shoes on base track section help stabilize the hoist on both pavement and dirt with a full 16 sq. in. contact area.
- Base track sections have cross tie support brackets that add rigidity and extra stability to the system.

Pivoting Hoist with Solar Panel Carrier

Pivoting Hoist with Classic Power Drive

Pivoting Hoist Accessories

Power Drives

The RGC Pivoting Platform Hoist offers two reliable power drive options to suit your job site needs. Each drive is designed to efficiently lift up to 400 lbs. with ease and precision.

PHD and Classic Drives mount up off the ground for convenient use on steep landscapes. Both drives smartly position operator handles to the side of the load for safe operation. RGC drives are easy to operate with minimal operator effort.

Classic HG Power Drive

PHD Drive This all-new drive features a compact, light-weight frame with the same powerful performance. Ideal for a variety of jobsites, the PHD operates with a single handle control that is safely positioned to the side of the load. Choose from Honda or Briggs & Stratton gas engines for solid performance in a variety of conditions.

Classic Drives The Classic power drive has been a favorite of pros for decades due to its reliable and long lasting performance. Dual handles provide precise, smooth control of the load. Choose from Honda and Briggs and Stratton gas engines or Baldor electric motor. The Classic is ideal for the most demanding job sites.
